

Anabac

Anabac is a treatment powder containing a specially-formulated range of micro-organisms, which biologically treats wastewaters in anaerobic system.

Application

- Anaerobic tank & anoxic tank of wastewater treatment plant
- Anaerobic digestion reaction tank
- HUSB & USAB & SBR & AMBR
- Septic tank & biogas reactor
- Sewer line & sanitary pipeline

Benefit

- ✓ Enhances COD, BOD and TSS removal efficiency
- ✓ Quick start-up and recovery anaerobic system to minimize the lag time
- ✓ Higher influent organic loading and increase hydraulic throughput
- ✓ Handle upset under cold weather operation
- ✓ Eliminates bad odours at their source
- ✓ Improves biogas generation & quality
- ✓ Lower capital costs and power consumption
- ✓ 100% natural, non-toxic and chemical free

Condition

- ORP <- 300, D.O<1 mg/L
- Temperature: 15~45 °C
- pH: 6 ~ 9
- Salinity <30000 mg/L

Composition

- Anaerobic bacteria blend and microbial carrier.
- Light tan powder, Weak odor;
- Bacteria count >2.9 * 10⁹cfu/g;

Caution

Do not mix with bleach, caustics, disinfectants or other chemicals.
